Introduction:

The purpose of this grant was two fold. The first purpose was to bring Internet capabilities to the Knoxville College campus for purposes of performing computational AFOSR research. The second purpose was to bring advanced UNIX computing capabilities to the campus and link them with similar capabilities at the University of Tennessee, Knoxville using the Internet.

It was decided to accomplish this task by purchasing portions of the equipment, software, and equipment through the University of Tennessee. This purchasing of these services through UTK resulted in a 43% discount from Sun Microsystems. This also allowed us to use all of the UTK site licenses for network services.

As specified in the initial grant, ten Sun Workstations were purchased 3 Sparcstation 10's and 7 Sparcstation LX's with the associated support equipment. In addition, 7 IBM compatibles were purchased for the Division of Natural Science, 1 Tektronix color laser printer, and 1 CD-ROM maker along with additional software to network these machines to the Sparcstation network.

Networking Strategy

In order to make the maximum use of the equipment for research, 2 of the Sparcstation 10's were designated for server applications. One is on permanent loan to the University of Tennessee to act as software license, and Usenet News server for the College with the second on site to act as local server for disk, networking, and print services. The third acts as backup server at Knoxville College and master research terminal. The 7 Sparcstation LX's are being used for student based research and faculty Internet access. Name and Gateway services are being provided by a Sparcstation 5 purchased by MIS funds from the College. A detailed bid sheet from Sun Microsystems is included in Appendix A.

All of the machines purchased have been interconnected using standard TCP/IP protocols. At present the College has wired McKee Hall, Wallace Hall, and the Student Center for Internet Services from internal College funds. Access to both laser and color print services are available from all of the Sparcstations. These machines are cross linked with counterparts on The University of Tennessee campus. At present the Knoxville College mounts and has access to all of the UTK

forest domain drives through the machine stationed on the UTK campus with no reverse access set up. This increases the storage capacity of Knoxville College while maintaining the Colleges independence.

Software Purchased:

Care was taken to select multipurpose software for the systems that would allow general purpose use with special purpose software to be supplied by future research grants. More specifically Autocad R12, Matlab R4.2, WordPerfect 5.1, and various SUN compilers were purchased for the Sparcs. Portions of the software were purchased through The University of Tennessee. The major software purchased through UT include the compilers and SUN OS for \$125.00 with constant upgrades for the next two years and Matlab for \$50.00/key-year for 10 keys. Matlab was used to replace the Mathematica package due to the less expensive price.

The OS on these systems has been upgraded twice by UT since the projects inception. Once from SUN OS 4.1.3 to Solarius 2.3, and a upgrade from Solarius 2.3 to 2.4.

Research Started Since Grant Inception:

Using this equipment, two funded research projects have been started and others have been proposed to assorted DoD agencies. The first project with AFOSR entitled "The Study of Efficient Plasma Sources" is both to model and experimentally study plasma sources with the University of Tennessee. This project is divided into two parts. The first part, being performed at Knoxville College, is to computationally model various plasma sources and then experimentally produce the same source at the University of Tennessee plasma science facility. This project has since then been modified, with the consent of the contract monitor to include work by Knoxville College on the AFOSR OOPIC code.

In conjunction with the work already started, a second project has been funded by the Office of Naval Research to link student laboratories at Knoxville College with the University of Tennessee. This will serve as a transitioning lab between Knoxville College and UTK. This will allow students to get training in elementary engineering courses at KC then transition to UTK for a full

engineering degree as well as get a second degree from Knoxville College.

Equipment Purchased From Cost Savings:

Because of the cost savings afforded to the joint KC-UTK work, excess uncommitted funds were remaining at the end of the contract period. Since part of the focus of the original research grant was shifted to include work on the IBM P.C. compatibles, it was decided to use part of the excess funds to purchase 9 IBM compatibles. Five 486-50's were purchased as student research machines along with 2 486-66's.

In addition two lap top computers have been ordered. One is a color 486-50 from Gateway 2000, with the second being a color 486-100 from the same company. Also included in the cost savings are 1 Tektronix IISX 300 dpi color laser printer, 1 Macintosh Quadra 840AV, and 1 CD-ROM maker. As of the writing of this report the IBM P.C.'s have been ordered, but have not been delivered. Delivery is expected in late April.

Conclusion:

All of the equipment specified in the original grant was purchased in accordance with AFOSR guidelines along with the technical support needed to install and maintain the equipment. In addition, with AFOSR permission, additional equipment was purchased through the grant from cost savings on the original quoted prices. These cost savings were achieved by the purchase of the Sun computer equipment through the University of Tennessee. This use of large state institution buying power resulted in the purchase of 11 additional computers, one CD-ROM maker, and one color laser printer.

Axil-220

The Axil-220 workstation family provides unmatched MicroSPARC™ price/performance and configuration flexibility. The Axil-220™ includes a variety of configurations as well as systems identical to the SPARCstation™ LX and SPARCclassic™.

Axil-220

The Axil-220 workstation family provides unmatched MicroSPARC™ price/performance and configuration flexibility. The Axil-220 includes a variety of configurations as well as systems identical to the SPARCstation™ LX and SPARCclassic™. For example, one option provides Fax/Modem, which allows immediate send and receive communications with any Group III/IV facsimile machine. Also two internal hard disk drives can be configured, saving space. Designed and built in the U.S.A., the Axil-220 workstations are guaranteed 100% SPARC™ compliant, so all Solaris®-based programs run without modification and Axil-220 Workstations integrate seamlessly into SPARC networks. In addition to supporting releases of Solaris 2.X, Solaris 1.1 is also available. Unlike other MicroSPARC-based systems which provide only a maximum of 96 MB of main memory, the Axil-220 supports a maximum of 128 MB of main memory for the more demanding engineering or database applications. The Axil-220 provides the most flexible, cost-effective MicroSPARC solutions available in the market today.

System Specifications Guaranteed 100% SPARC compliant

Processor			
Architecture	SPARC Version 8, Micro-SPARC 50 MHz	Audio (continued)	With GX graphics: 16-bit audio with internal speaker and external microphone. External speaker box supporting 16-bit audio optionally available.
Memory Management	SPARC reference MMU with 64 contexts		
On-Chip Cache	2 KB data, 4 KB instruction		
Performance			
SPECint	26.4	Mass Storage	
SPECfp	21.0	Internal Floppy Disk	Optional 3.5 inch, 720 KB/1.2 MB/1.44 MB, aut eject
MIPS	59.1	Internal Hard Disk	Maximum of two 3.5" low-profile disks (207 MB or 540 MB)
MFLOPS	4.6	Supported External Storage	1.3 GB Disk, 150 MB 1/4 inch Tape Drive, 644 MB CD-ROM Drive (5.25 inch)
System Memory		Supported Software	
Standard	16 MB	Operating Environment	Solaris® 1.1, Solaris 2.X
Maximum	32 MB with 8 MB SIMMS 128 MB with 32 MB SIMMS	Operating System	SunOS™ 4.1.3, SunOS 5.X.
Memory Type	Parity	Windowing System	Open Windows™ Version 3
Standard Interfaces		Languages	C, C++, Pascal, FORTRAN
Ethernet	10Mb/sec twisted pair standard (10-Base T). AUI available with optional adapter cable	Networking	ONC™, ONC+™, NFS™, MHS
SCSI	10 MB/sec SCSI-2	Graphics	TCP/IP, SunNET™ OSI
Serial	Two RS-232C/RS-423 serial ports		SunVision™, SunPHIGS™, XGL™, SunGKS™, Xlib, PostScript®
Parallel	Centronics-compatible parallel port		
SBus	Two expansion slots, 32-bit data path	Display Options	
Audio	With CG3 graphics: 8-bit audio; internal speaker and external microphone.	GX Resolution	Accelerated 8-bit 2-D/3-D wire frame, 1024 x 768 or 1152 x 900 resolution
		CG3	1024 x 768 (SVGA) or 1152 x 900 resolution
		Monitor Support	15, 17 and 20 inch color

Axil 311 Model 4.0

The Axil-311 Model 4.0 sets the price/performance standard for SPARCstation™ 10 compatibility. Based on SuperSPARC™ MBus technology, the Model 4.0 provides the ideal platform to handle your most demanding applications.

Axil 311 Model 4.0

The Axil-311 Model 4.0 workstation sets the price/performance standard for SPARCstation™ 10 compatibility. Based on SuperSPARC™ MBus and multimedia technology, the Model 4.0 provides the ideal platform to handle your most demanding business, scientific, and engineering applications. The Model 4.0 can easily be upgraded to multiprocessing capability.* In addition, the Model 4.0 is designed and built in the U.S.A. and is guaranteed 100% SPARC® compliant so you can integrate it into your SPARC network with confidence. At Axil Workstations, we don't just deliver promises, we deliver performance with productivity.

System Specifications Guaranteed 100% SPARC compliant

Processor Module

Architecture	SuperSPARC Version 8
Clock Rate	40 MHz
Cache (on-chip)	36 KB (20 KB instruction, 16 KB data)

Performance (at 40 MHz)

SPECint 92	50.2
SPECfp 92	60.2
MIPS	109.5
MFLOPS	22.9

System Memory

Standard	32MB
Maximum	512 MB
Memory Type	ECC
Buswidth	144 bits
SIMM Size	16 MB, 64 MB

I/O Interfaces

SBus	Four expansion slots, 32-bit width.
Ethernet	10 Mbit/sec built-in 10Base-T (Twisted Pair), separate AUI adapter cable
SCSI	10 MB/sec SCSI-2
ISDN	Dual basic-rate interface (4-wire NT, 4-wire TE)
Serial	Two RS-232C/RS-423 ports
Parallel	Centronics compatible parallel port
Audio	CD quality, stereo 16-bit digital audio (external speakers and microphone included with optional audio kit)

Mass Storage

Internal Floppy Disk	3.5 inch, 720 KB/1.2 MB/1.44 MB, autoeject
Internal Hard Disk	Maximum of two 3.5 inch disks (540 MB, 1.05 GB or 1.3 GB)
Supported External Storage	1.3 GB Disk, QIC-150 Tape Drive, 644 MB CD-ROM Drive (5.25 inch)

Supported Input Devices

Keyboard	Sun™ Type 4-5 compatible
Mouse	3-button optical

Supported Software

Operating Environment	Solaris® 1.1, Solaris 2.X
Operating System	SunOS™ 4.1.3, SunOS 5.X
Windowing System	OpenWindows™ Version 3
Languages	C, C++, Pascal, FORTRAN
Networking	ONC, ONC+, NFS, MHS, TCP/IP, SunNET™ OSI
Graphics	SunVision™, SunPHIGS™, XGL™, SunGKS™, Xlib, PostScript®

Display Options

GX Resolution	1152(H) x 900(V), 76 Hz refresh rate
GXplus Resolution	1280(H) x 1024(V), 67 Hz refresh rate
CG3, SVGA also supported	
Monitor Support	15, 17 and 19 inch color

* Solaris 2.X required for multiprocessing.
